

**Remarks: General**

Applicant wishes to thank the Examiner for scheduling the time to conduct a personal interview in this application.

The claims have been amended by rewriting Claim 11 to add thereto the limitations of Claims 15 and 17, and canceling Claims 15 and 17 without prejudice to or disclaimer of the subject matter thereof. As the limitations added to Claim 11 derive from Claims 15 and 17, no new matter is added by this amendment.

The amendment to Claim 11 has been made for the purpose of removing from the scope of the claims only the tetrameric compound disclosed by U.S. Patent No. 4,171,298.

As the amendments to Claims 16 and 18 have been only for the purpose of correcting dependencies, those amendments are not related to patentability.

A supplemental Information Disclosure Statement ("IDS") pursuant to 37 CFR §1.98 is enclosed, for which the fee stated in §1.17(p) is due by reason of §1.97(c)(2). Please charge this fee to Deposit Account No. 04-1928 (E.I. du Pont de Nemours and Company).

A petition under 37 CFR §1.136 for a two-month extension of time to respond the Examiner's action is enclosed, the fee for which should be charged to Deposit Account No. 04-1928.

If any fee other than or in addition to those mentioned specifically above is required to authorize or obtain consideration of this response and the enclosed IDS, please charge such fee to Deposit Account No. 04-1928.

Claims 11~14, 16, 18~21 and 34 are now active in the application. Applicant hereby requests reconsideration and further examination of the application in view of the reasons it has set forth below for allowance of the claims.

**Remarks: Detailed Action**

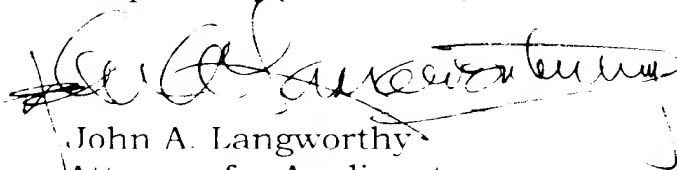

The Examiner has maintained the rejection under 35 U.S.C. §103(a) that Claims 11~21 and 34 are unpatentable over US 4,171,298 ("Minagawa"). Claims 15 and 17 have been canceled.

As previously noted by Applicant, (i) the structure shown in Column 15 of Minagawa is not a polymer or polymeric composition, but is rather at most a tetrameric compound, and (ii) the presence of a 2-orthoalkylhydroxybenzenepropane-1,3-diol in the compound of Minagawa does not fulfill the requirements of Claim 11 because the diol portion of the 1,3-diol that participates in the formation of the tetrameric compound is aliphatic not aromatic. With the amendment herein, Applicant has added further features to describe the component (2) and component (3) from which Applicant's polymeric composition is made, which features are not taught or suggested by Minagawa.

In view of the above distinctions between Minagawa and the subject matter of Claims 11~14, 16, 18~21 and 34, Applicant respectfully requests that the Examiner withdraw the rejection of those claims under 35 U.S.C. §103(a).

In view of the foregoing, Applicant submits that all of the Examiner's objections and rejections have been properly traversed, and that the pending claims are in condition for allowance, request for which is hereby respectfully made.

Respectfully submitted,
